“Managing a widespread business poses several operational challenges.

Our cement manufacturing business has tremendous scope for growth and development which can become easy with efficient management of our everyday business operations.

Plumsoft’s ERP solution provided our business with this edge that it lacked.”

- *Dhananjay Tekmalkar,
Asst. General Manager (F &
A), Toshali Cements*

Business Challenge

Client has cement manufacturing plants spread across different geographical regions. The company used manual process of recording transactions that took place at all the remote locations. The client’s staff used a manual system with the help of Microsoft Excel sheets to record everyday transactions and to create necessary reports. Manual recording of everyday business transactions meant there was lack of supervision by the management.

Client’s business operation units were spread across various locations as the plants were located remotely. This made it further difficult for the management to receive quick and accurate everyday reports on material consumption, sales and other vital business aspects. As all records and updates were made manually and communicated via emails, there was always a scope for delays and inconsistency in reporting.

Solution:

In order to overcome the business challenges and to streamline the business operations, the client chose to implement Plum ERP solution. With Financial Management, Fixed Asset Management, Marketing & Sales, Material Purchasing and Inventory modules, the cloud based Plum ERP solution provided the business with improved efficiency and productivity.

The PlumERP solution provided comprehensive functionality to client’s by providing the management with access to crucial data from all business locations instantly. With automation of report generation and recording of everyday transactions, there was minimal scope for any errors.

Results:

Plum ERP solution brought a high level of integration and flexibility in the management of client’s business. The efficiency of the business improved considerably with accurate recording of business data.

- The successful implementation of Plum ERP solution helped the procurement team to analyze accurately the requirement of resources at different plants and meet the demands in a timely manner.
- The Financial Management module brought about an overall control for the management. Everyday transactions across all plants can be easily monitored and this means better supervision and control.
