

# Ensuring Efficiency with Plum e-Governance

## Client Profile

**Client: MNIT Jaipur** - Leading educational institution of India

### Background:

- Client is a premier India educational institute that was established in 1963.
- With over 200 faculty members and over 6000 students, the institution faces several growth related challenges.
- No. of courses: 1200+
- No. of Departments: 15

*"I have the satisfaction of having been able to steer the e-governance mission with the support and involvement of various functionaries in the Institute. The plumware framework came handy in implementing this integrated e-governance project in a record time. The professional competence and commitment shown by TEAM-PLUMSOFT during this period is worth praising."*

- *S. D. Bharti, Convener,  
E-governance Mission, MNIT  
Jaipur.*

## Business Challenge

Client is a reputed educational institution operating with a large student base. The institution used manual records and processes to manage all day-to-day operations. With the number of students increasing by the day, maintaining and updating academic records became a herculean task. Tasks such as updating admission records, maintaining student-related details, transport details, attendance records, performance records, and other such information including maintaining financial records became increasingly tedious.

The management realized the immediate need for an integrated e-Governance solution that would help in easing everyday operations by automating administrative and finance-related activities. The management aimed at improving transparency, efficiency and productivity by implementing an automated e-Governance solution.

## Solution

Client chose to implement Plum e-Governance, a PlumERP solution on the cloud. PlumERP's Academic and Finance modules were customized to meet the requirements of the institution. The Plum e-Governance platform integrated all the essential functions and operations of the institution and made day-to-day tasks simple, which were otherwise challenging and time consuming.

The PlumERP solution offered faster dissemination of information at a lower cost. This further enhanced efficiency in the manner in which everyday activities were conducted.

## Results

The flexibility and customization offered by PlumERP enhanced the overall efficiency of the institution. The management, staff and students were connected with a lot more ease and this ensured real-time dissemination of information.

- There was a significant reduction in costs with less labor needed to maintain PlumERP as against manual maintenance of various academic, administrative and financial records.
- Implementing PlumERP led to standardization of various business processes and activities.
- The management and staff got real-time access to up-to-date data.
